## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by US Patent Number 3,633,158 to Heibel.

Regarding to claim 1, Heibel discloses a reflective optical apparatus (*fig 2 and 3*) for a free-space optical communication system (*col 4, ln 13-20*) and

the reflective optical apparatus comprising:

a housing having a front opening (*housing 10, fig 2, where a front opening is inherently required such that signal 16 can be sent out as shown in fig 2*);

a reflective member mounted in the housing and having a concave reflective surface with a focal point and the concave reflective surface facing the front opening of the housing (*concave reflector 48, fig 3*);

an optical transceiver (*transmitter 42 and photodiode 44 together acts at a transceiver, fig 3; col 4, ln 54-56*) mounted at the focal point of the concave reflective surface (*position of the transceiver in fig 3 relative to the concave mirror is analogous to applicant's fig 1; also described in col 4, ln 71-75*); and

a protective window mounted in the housing between the transceiver and the front opening of the housing (*50, fig 3*).
